

# CURIS<sup>®</sup>

DECONTAMINATION

**Hydrogen Peroxide Pulse Mist™**

# Kills 99.9999% c.diff spores in a Tri-Part soil load

3 tests, 93 carriers of c.diff endospores in a tri-part soil load INACTIVATED (ATCC#4598)

**99.9999% LOG REDUCTION ACHIEVED**

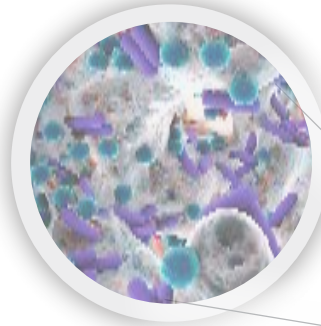

EPA registration #93324-1

✓ **BEAD INOCULUM**  
Clumped tight on a disk = harder to kill

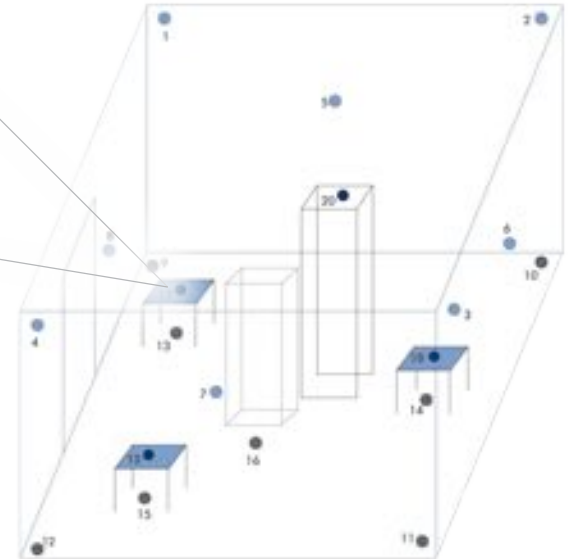

✓ **SOIL LOAD INACTIVATION**  
Mimic real world (3 part soil load)

✓ **THICKER CELL WALL**  
Engineered to be harder to penetrate

✓ **KILLED at...**  
12 feet, On the floor, Under obstacles  
Horizontal, Vertical, Inverted

3000 cuft room

## Empower Your Staff & Protect Your Facility

- Remote or manual operation
- Patented multi sync function
- Auto calculation
- Under Fog Protection™
- EPA registered and validated

## Treat Pathogens Anywhere They Travel

“The Suitcase”

At 36 lbs, CURIS® is versatile enough to treat rooms, isolators, and gnotobiotic chambers

The CURIS® Advantage

## Increase Performance & Save Money

More powerful than other fogging systems while consuming less solution to the treatment space

# Proving Your System Works Every Time

## Are decreased ATP readings a result of the no-touch system or the manual pre-clean?

Chemical indicators prove the exposure to the solution not the effectiveness of the treatment. The use of biological indicators ensures your treatments are science based and prove your fog is achieving a 6 log 99.9999% spore reduction on challenged indicators. We are so certain of our system's effectiveness we pair *Geobacillus* BI's as a validation tool **so you know it works.**

## Wireless Operation & Cloud-Based Surveillance Technology

In a world where everything is documented to defend, reinforce, train, and track information, CURIS® System Data Management (CSDM) is your protection and advocate. Real-time unbiased data provides peace of mind knowing your disinfection efforts are documented.
